Rahul Rathod

iOS Developer

rahul.ios@outlook.com

Ahmedabad, Gujarat

Highly passionate, creative and results-oriented individual working as an iOS Developer seeking challenging work that lets me build stable, creative and UI-extensive iPhone/iPad apps.

WORK EXPERIENCE

iGate

Technical Lead | July 2012 – September 2016

As an iOS Developer, I was responsible for experimenting and rapid prototyping of new concepts as well as maintaining the existing projects.

- Built external VR Framework which enables the app to be used as a VR extension
- Rapidly developed applications for clients like 3M, SJM and Olympus.
- Lead a team for external projects along with development and client communication

PERSOURCE

Assistant Software Developer | April 2011 - June 2012

During my experience, I had exposure to various areas of app development such as productive coding, performance improvements, code optimization, etc.

- Co-developed the product EventEdge from scratch
- Lead a small team for external projects along with development and client communication

PROJECTS

AVIS

Website - https://www.avis.com

- Built an enterprise app for the client in Swift.
- Built Social Stream
- Worked with different modules to connect drivers and customers for AVIS.

3M

- Built internal SDKs for easy integration of different modules

- Restructured existing Algo Structure for performance improvement

- Led the development cycle for the whole app

SHFL

- Hobby Project which got turned to a full-fledged Music Player

- Built Transfer module, which enables Users to send songs to other iOS Devices with the help of Multipeer Connectivity

- Built custom AVQueuePlayer which handles all complex functions like shuffle on/off, repeat functions, etc

EVENTEDGE - VERSION 2014/15 (www.eventedge.co)

- Actively worked in development cycle in the team for the whole app

- Worked on building Chat-like Forums module for attendees via Push Notifications

- Built Social Stream(Twitter-like feeds structure) where Users can post/comment/favorite feeds

- Responsible for designing/implementing modules for Profiles and Contact Swap

BIRDBOX

- Co-developed iOS7-only app with exposure to techniques like Block Programming, MVC, AutoLayouts using VFL and ARC

- Implemented slideshow section of Photos using UICollectionView similar to Photos App for iOS

- Built control for Custom-sized image cropper similar to standard cropper for UIImagePickerController

PRESCRIBE FOR iPAD

iTunes Link - http://apple.co/2byB93z

- Led the development cycle for the whole app

- Created UI framework for drag and drop of objects just like iOS Home Screens

- With the help of effective client communication and proper work management, milestones were achieved earlier than initial plan

- Built responsive UI design for Users to customise exercises according to their own needs

FUNCTIONAL TRAINING FOR iPAD
